Onsite Wastewater Training Seminars Scheduled

Are you registered yet? The first of our five (5) Onsite Wastewater Training Seminars is scheduled for February 28th at our Portage production facility.

This year we have added an additional location to accommodate customers in the Rhinelander area. The Rhinelander Onsite Wastewater Training Seminar will be held on Thursday, March 27th at the Pine Lake Fire Hall in Rhinelander, Wisconsin.

In addition the Portage and Rhinelander events, there are seminars scheduled for Shell Lake, Wisconsin, Fond du Lac, Wisconsin and Maiden Rock, Wisconsin. Advance registration is encouraged.

You can find a registration form

on our website wieserconcrete.com or give us a call and we'll send a registration form to you.

Our one-day seminars provide six (6) continuing education credits for: Journeyman Plumber, Journeyman Plumber-Restricted Service, Master Plumber, Master Plumber-Restricted Service, POWTS Inspector, POWTS Maintainer, Soil Tester.

Participants up-close and personal with hands-on training.

Cover Story

The featured story in the January 2008 edition of Onsite Installer has the spotlight on an onsite wastewater project featuring Wieser Concrete precast tanks.

The project is located in St. Augusta, Minnesota, a suburb of St. Cloud. The system was installed by Steve's Excavating, Inc. of St. Cloud and included five (5) large Wieser tanks. A more in-depth look at this project will be featured in next month's edition of Connections.

Show Schedule

For Show Locations, Visit our Website

Show	Dates
MCPX/NPCA Convention	February 6-9, 2008
World Ag Expo	February 12-14, 2008

THROUGH WIND, AND RAIN, AND SNOW?

December is most famous for the hustle and bustle of holiday shopping and celebrating Christmas but for two of our Wieser Concrete Installation team members, December was work as usual, almost.

Late in October, Wieser Concrete received an order for a 1073LF of our 16' L-Panel to be used as a sound barrier for a transportation company in Webster, Massachusetts. This wall was supposed to be completed in early December but Mother Nature had other ideas.

The project involved the delivery and setting of 161 16'-L-panels. The panels were delivered to the jobsite in 40+ semi-loads where our expert installation crew members would unload and set the panels in place. Everything was set to proceed within a normal timeline when Mother Nature decided to hit the Northeast with snow and lots of it!

Our crew found themselves unloading semi's as

they arrived through the snow and setting the panels in between snow and ice. Our installation crew left Maiden Rock for this project the week of December 10, 2007 and through wind, rain and snow successfully completed the project to return home just in time for Christmas.

Shoveling Out in the Morning

No matter what the weather, Wieser Concrete delivers. We are proud of our customer service tradition and continually look for opportunities to improve our product and service to serve you better.

For the quality precast you expect and the service you deserve, contact Wieser Concrete today.
