

# Making the Grade

Wieser Concrete Products, Inc. Maiden Rock Facility celebrates their 20th consecutive NPCA Plant Certification designation.

**J**uly 29, 2009 - **Wieser Concrete Products, Inc.** located in Maiden Rock, Wisconsin is pleased to announce their **Maiden Rock and Portage production facilities** have been awarded status as a National Precast Concrete Association (NPCA) **Certified Plant**. The designation recognizes **Wieser Concrete Products, Inc.** as precast concrete manufacturing plants operating at the highest standards of production and quality control.

NPCA established its national Plant Certification Program in 1987 to ensure a consistent industry benchmark and a high degree of excellence among precast operations. The program involves a comprehensive review of all aspects of a plant's manufacturing processes. To achieve certification, participants must pass an initial inspection. Plans then maintain certification by passing periodic, unannounced on-site inspections conducted by an independent engineering firm.

**Wieser Concrete's** Maiden Rock production facility earned its initial NPCA plant certification in 1989 and each year since, has earned the NPCA Certified Plant designation.

**Wieser Concrete's** Portage production facility earned its initial NPCA plant certification in 1995 and has maintained this designation for the past 14 years.

By purchasing products from certified plants, contractors are assured they are receiving products that come from an organization dedicated to the highest level of quality throughout the manufacturing process.

Wieser Concrete Products, Inc. Portage Facility celebrates their 14th consecutive NPCA Plant Certification designation.

World Dairy Expo Madison, Wisconsin	September 29 thru October 3, 2009

# BUILDING COMMUNITY

In 1965, Joe Wieser journeyed from LaCrescent, Minnesota with his family, to the beautiful Rush River valley where they established **Wieser Concrete Products**. Since that time, **Wieser Concrete** has been involved in building community in many ways. From providing employment to supporting community causes to sharing time and resources to build community organizations, **Wieser Concrete** has been active in the community it calls home.

Each year Plum City, Wisconsin celebrates community with a three-day, fun-filled celebration called FunFest. This event is organized by the Plum City American Legion and many of the activities are held at the nine-acre American Legion Park located in Plum City.

This year, the Legion wanted to add a large shelter to the park that would serve as a gathering place for community events. With the help of the entire community, the Plum City American Legion was able to erect a beautiful open pavilion that was ready in time for the annual FunFest event held July 17-19, 2009.

**Wieser Concrete** was pleased to participate in this community project lending time and resources to make the vision of the Legion a reality.

Building communities is the cornerstone of our state and country. **Wieser Concrete** is pleased to contribute to building the foundations of our hometown, Plum City, Wisconsin.

Plum City, Wisconsin was featured in Ayres Associates Trends Magazine.
