

# WIESER CONCRETE HAPPENINGS

## NPCA Certification

Wieser Concrete - Maiden Rock, Wisconsin

The National Precast Concrete Association (NPCA) is pleased to announce that **Wieser Concrete Products Inc., Maiden Rock, Wisconsin** has been awarded status as an **NPCA Certified Plant** for the 19<sup>th</sup> consecutive year.

**NPCA** established its national Plant Certification Program in 1987 to ensure a consistent industry benchmark and a high degree of excellence among precast operations. The program involves a comprehensive review of all aspects of a plant's manufacturing processes. To

achieve certification, participants must pass an initial inspection. Plants then maintain certification by passing annual, unannounced on-site inspections conducted by an independent engineering firm.

According to Ty E. Gable, NPCA president, **Wieser Concrete Products, Inc.** has proven its commitment to producing high quality precast products by attaining certification. Engineers and architects who specify NPCA certification and contractors who purchase products from **Wieser Concrete Products, Inc.** can be assured that they are receiving products that come from an organization dedicated to quality throughout the manufacturing process.
