2011 Wieser Onsite Wastewater Training

Onsite Wastewater Professionals can earn continuing education credits required by the State of Wisconsin in one, fun-filled day at the **2011 Onsite Wastewater Training Seminars** sponsored by **Wieser Concrete**.

Seminars qualify as six (6) credits toward Wisconsin's continuing ed-

ucation requirement and feature informational sessions, and industry vendor displays showing the latest onsite technologies. Attendees will also have an opportunity to network with industry and regulatory professionals.

Five seminars will be held in March, 2011. The dates and locations are:

- March 8 - Fond du Lac, WI
- March 10- Arbor Vitae, WI
- March 15 - Maiden Rock, WI
- March 17 - Portage, WI
- March 22 - Shell Lake, WI

2010 Seminar Vendor Display

If you would like to receive advance registration information electronically, please e-mail amys@wieserconcrete.com, visit us on the web at wieserconcrete.com or contact your nearest **Wieser** office.

Stop In and Say "Hello"

BACK AGAINST THE WALL

Walls are erected everyday for a variety of reasons and **Wieser Concrete** has a precast solution for every purpose.

Whether holding back soil, reducing highway noise, or defining space, walls can do it all. Whatever wall your project requires, **Wieser Concrete** has a solution that will provide the most cost-effective, efficient, quality precast option available on the market today.

Our **Evergreen Wall**, as shown below, is the perfect option for a wall that has the capacity to hold back large volumes of soil but also creates a living wall of beauty.

London Boulder™ combines the natural aesthetics

of boulder walls with the proven strength and reliability of traditional segmental retaining wall units. At roughly 2000 pounds each, the sheer mass of these units allows the installer to build a nine (9) foot high wall with limited excavation and no reinforcements.

Other wall options include **Wieser's** L&T freestanding panels, precast post and panel construction and custom-designed wall units to fit any project specifications.

When your project requires precast, the professionals at **Wieser Concrete** have your back delivering the innovation, quality and service you demand and deserve.
