WIESER CONCRETE HAPPENINGS

Celebrating Safety

PORTAGE, WI – On October 17th, 2008, Wieser Concrete Products, Inc. celebrated a Safety Record Milestone. The Wieser Concrete Portage Precast Production facility has been accident free for two (2) years. During the past two years, the Portage work team has had no loss time injuries and they continue to add to this outstanding safety record.

To celebrate this milestone, Andy Wieser, President of Wieser Concrete, Mark Wieser, Vice President of Wieser Concrete and Safety Manager, Andy Winkler, prepared and served a grilled steak dinner that was enjoyed by the entire team.

Wieser Concrete's Portage precast facility produces a wide array of precast products for agricultural, commercial and highway applications with a focus on large tanks with capacities up to 40,000 gallons.

2009 Onsite Wastewater Training Seminars

Onsite Wastewater Professionals can earn continuing education credits required by the State of Wisconsin in one, fun-filled day at the **2009 Onsite Wastewater Training Seminars** sponsored by **Wieser Concrete**.

Seminars qualify as six (6) credits toward Wisconsin's continuing education requirement and feature informational sessions, and industry vendor displays showing the latest onsite technologies. Attendees will also have an opportunity to network

with industry and regulatory professionals.

Seminars will be held in March, 2009 including seminars held at our Maiden Rock, Fond du Lac and Portage, Wisconsin production facilities. Additional locations to be announced when available.

If you would like to receive advance registration information electronically, please e-mail amys@wieserconcrete.com or contact your nearest Wieser office.

Stacking Up a New Look

Every large city has its challenges with traffic congestion and usually there are certain highways that consistently prove to be an area of congestion no matter what time of day. In Minneapolis/St. Paul, Minnesota, Highway 62, or better known as the Crosstown, was such a highway. In 2007, the Minnesota DOT began a project to relieve the congestion.

This new design includes a precast concrete retaining wall. During the letting process, many designs were submitted for consideration and ultimately the stacked panel design shown below was the wall of choice.

This retaining wall consists of 306,584 square feet of panel and post. **Wieser Concrete** began producing the components of this wall in the summer of 2007 and production continues today with expected completion of the project estimated to be late 2009/early 2010.

This wall project is just one of many that **Wieser Concrete** produced this year. From our standard L&T panel product used for security and privacy walls, to posts and form-liner panels and our London Boulder walls, **Wieser Concrete** has a wall product for every application. Precast concrete walls are a cost-effective solution that is as attractive as it is durable.

Wieser Concrete has many innovative options for any wall application. Whether

it's a landscape retaining wall or a highway sound abatement wall, **Wieser Concrete** has the perfect precast solution. Contact your nearest **Wieser** office today for the precast in your next project.
