WIESER CONCRETE HAPPENINGS

Safety is Job One

FOND DU LAC, WI - On September 11th, 2008, **Wieser Concrete Products, Inc.** celebrated a Safety Record Milestone at their **Fond du Lac** Precast Production facility. During the past two years, the Fond du Lac work team has had no loss time injuries and they continue to add to this outstanding safety record.

To celebrate this milestone, Andy Wieser, President of **Wieser Concrete** and Vice President of **Wieser Concrete**, Mark Wieser, prepared and served a grilled steak dinner that was enjoyed by the entire team.

Wieser Concrete's Fond du Lac precast facility produces a wide array of precast concrete products including septic tanks, various underground products, bunker silo walls and components for **Wieser Concrete's** Pan-L-Bilt Underbarn Manure Storage Systems.

2009 Onsite Wastewater Training Seminars

Onsite Wastewater Professionals can earn continuing education credits required by the State of Wisconsin in one, fun-filled day at the **2009 Onsite Wastewater Training Seminars** sponsored by **Wieser Concrete**.

Seminars qualify as six (6) credits toward Wisconsin's continuing education requirement and feature informational sessions, and industry vendor displays showing the latest onsite technologies. Attendees will also

have an opportunity to network with industry and regulatory professionals.

Five seminars will be held in March, 2009 including seminars held at our Maiden Rock, Fond du Lac and Portage, Wisconsin production facilities. Additional locations will be announced next month.

If you would like to receive advance registration information electronically, please e-mail amys@wieserconcrete.com or contact your nearest Wieser office.

On-Time Performance

On August 26th, 2008, **Wieser Concrete** received a call from the University of Wisconsin-Madison of Madison, Wisconsin asking if we would be able to supply 600' of 12' L Panel for a project on their campus. The university was told by the contractor, who was originally awarded the project, that they would be unable to deliver and install the required panels by August 30th as their contract stipulated.

Now on August 26th, they were asking **Wieser Concrete** to provide the 600' of 12' L- panel and have them installed by August 30th before the new academic year began. After discussing the project with their production facilities to ensure their current customers would not be adversely affected by accepting this project, **Wieser Concrete** agreed to the requirements of the request.

Delivery of the 12' L-Panel began on August 27th with a total of 18 semi loads making their way to the University of Wisconsin-Madison campus. **Wieser's** installation crew was on the jobsite ready to install the panels when the first load arrived and began setting panels immediately.

The final piece of this project was set in place on August 28th, exceeding the required installation deadline of August 30th by two days!

Wieser Concrete is proud of our tradition of exceptional customer service and satisfaction. We were pleased we could work this project into our schedule and ensure the University's project was completed by the time students

arrived for the new academic year.

Wieser Concrete continues its tradition of providing our customers with quality, innovative product and the service they need and deserve.
